

Third Life Tile

Product Overview

Third Life Tiles: Australia's Hardest Working Rubber

Built from resilience and designed for real life, Third Life Tiles are a tough, affordable flooring solution made for Australian homes, garages, and workshops. Each tile carries a story of transformation - taking discarded tyres, giving them new purpose in premium flooring, and then reclaiming off-cuts to create a durable DIY surface that works as hard as you do.

This isn't just recycled rubber. It's re-recycled - engineered through a unique "third life" process that keeps valuable material out of landfill and puts it back where it belongs: under your feet.

Made locally from Australian tyre waste, Third Life Tiles deliver proven durability at a price that makes sense. The same high-density rubber that's endured thousands of kilometres on the road is now repurposed into a surface that stands up to heavy use, impact, and everyday wear - without compromising on sustainability.

Designed with DIY in mind, the tiles are easy to handle and install, giving you a reliable, no-fuss flooring solution you can trust. From shed floors to home gyms, Third Life Tiles are made to take a beating - and keep going.

Specifications

Material	Polymerically bound recycled rubber and 6% EPDM
Density	725kg/m ³
Thickness	5mm, 10mm, 15mm, 20mm
Dimensions	1m x 1m
Tolerances	Dimensions - $\pm 1.5\%$ Thickness - $\pm 1\text{mm}$ Density - $\pm 5\%$
Appearance	Flat sliced surface with fine cavernous texture. Appearance will vary with each batch due to recycled re-grind content.

Applications

General purpose use, suitable for indoor and outdoor environments requiring durable safety surfacing.
