How to clear up a cloudy pool

Filter Cleaner & Degreaser

Supa Flocc

Crystal Clear Concentrate

Cloudy water can transform the most expensive, luxurious pool into an embarrassing eyesore. It will also cause bather discomfort and lead to short filter cycles, requiring frequent backwashing or cartridge cleaning.

For a thorough explanation on the correct use of these products, please refer to information contained on the packaging.

Cause

Cloudy water can be caused by a number of factors.

- Incorrect water balance causing precipitation of dissolved material
- Debris that has washed or blown into the pool.
- Oxidised material, usually occurring after shock treatment
- Problems associated with filtration
- Insufficient oxidiser

Problem

- Unpleasantly, unswimmable water
- Bather discomfort
- Sore Eyes
- Short filter cycles

Prevention

- Have water regularly professionally tested at Clark Rubber
- Maintain sanitiser residue
- Filter 8 hours per day over Summer
- Regular use of **Filtrite Crystal Clear Clarifier** .

'Clear up a cloudy pool by following these simple steps'

Solution

Step 1

- Have pool water professionally analysed at your local Clark Rubber store.
- pH must be at 7.8 for **Filtrite Supa Flocc** to work correctly
- If pH is low, use **Filtrite pH Buffer**.

Step 2

- Add **Filtrite Supa Flocc** at 1 litre per 50,000 litres pool water.
- Mix in bucket and distribute throughout pool.

Step 3

- Run filter on "Recirculate" for 2 hours.
- For cartridge or DE filters remove cartridge or grids.

Step 4

- Turn off filter and allow residue to settle to pool floor.

This may take 1 to 2 days.

DO NOT DISTURB THE WATER WHILE SEDIMENT IS SETTLING.

Step 5

- Vacuum debris to waste.

Step 6

- For severe cloudiness you may need to repeat treatment

Step 7

- Use **Filtrite Crystal Clear Clarifier** to help maintain water clarity.

Step 8

- For sand filters, ask your local Clark Rubber store about replacing the filter media. Your Clark Rubber store can advise you when is the most suitable time to replace your filter sand.
- For cartridge filters, clean cartridge using **Filtrite Filter Cleaner and Degreaser**.

Step 9

- Ensure filter is run 8 hours per day in Summer to ensure sufficient water circulation.

Make sure you have a FREE professional water analysis of your pool or spa water at your local Clark Rubber store every 4 weeks. Ask for your FREE water sample bottle.
