# How to make your pool sparkle

Pool water should be sparkling. Dull water detracts from the aesthetics of your pool and can cause bather discomfort.

For a thorough explanation on the correct use of these products, please refer to information contained on the packaging.

## Cause

- Filtration issue
- Incorrect water balance
- Low sanitiser level

## Problem

- Poor water appearance
- Bather discomfort
- Excessive sanitiser consumption

## Prevention

- Maintain water balance
- Regular use of a sanitiser
- Clean filter regularly
- Regular use of a **Filtrite 4 in 1 Clarifier** and **Filtrite Clarifier Cube**
- Use of **Filtrite Phosphate Eliminator**

**'Make your pool sparkle by following these simple steps'**

## Solution

### Step 1

- Check water balance is correct at your local Clark Rubber store.

### Step 2

- Filtration should be run 8 hours per day over Summer.
  - If using a sand filter backwash first.
  - If using a cartridge filter clean using **Filtrite Filter Cleaner and Degreaser**.

### Step 3

- Add **Aqua Boost** at 500 gms per 50,000 litres water. Bathers may not use the pool for 30 minutes.

### Step 4

- Ensure sanitiser level is sufficient, between 2 and 3 ppm.

### Step 5

- Add **Filtrite Phosphate Eliminator** at the required dosage rate.

### Step 6

- Add **Filtrite 4 in 1 Clarifier** as the initial treatment to make the water sparkle. An added benefit of this is that it will also remove suntan lotion, body fats and oils along with dissolved metal particles and dead algae spores

### Step 7

- Add **Filtrite Phosphate Eliminator**. Your Clark Rubber store can test and advise of the quantity required.

### Step 8

- To maintain sparkling water add **Filtrite Clarifier Cube** once per month to pump basket.

*Make sure you have a FREE professional water analysis of your pool or spa water at your local Clark Rubber store every 1- 2 weeks. Ask for your FREE water sample bottle.*
