Chlorine is a very effective sanitiser for swimming pools, however for people with sensitive skin or allergies to chlorine, Clark Rubber have an alternative. **Filtrite Pool Sanitiser** is a revolutionary non chlorine sanitiser for swimming pools. It is registered and approved by the APVMA.

- Controls bacteria in swimming pools without the use of chlorine or bromine.
- It must be used in conjunction with **Filtrite Ultimate Algaecide** and an oxidiser such as **Aqua Boost**.

'Following these simple steps to have a chlorine free pool'

Step 1

- If pool is green, shock dose with chlorine to eradicate algae. **DO NOT ADD FILTRITE POOL SANITISER UNTIL ALL CHLORINE HAS BEEN ELIMINATED FROM THE POOL WATER.**
- Use **Chlorine Remover** if necessary. Chlorine level must be 0 before adding **Filtrite Pool Sanitiser**.

Step 2

- Add 60 ml per 10,000 litres of **Filtrite Pool Sanitiser**. Mix in a bucket and distribute throughout pool.

Step 3

- After 24 hours add **Filtrite Ultimate Algaecide** at 80 ml per 10,000 litres.

Step 4

- Ensure water balance is correct and pH maintained between 7.4 – 7.6.

**It is not uncommon for pool water to go cloudy after initial dosage. Water will clear after 2 or 3 days from filtering.*

Ongoing Maintenance

- Add **Filtrite Pool Sanitiser** weekly at 60 ml per 10,000 litres.
- Add **Filtrite Ultimate Algaecide** every week at 80 ml per 10,000 litres
- Add **Aqua Boost** weekly, 50 gms per 10,000 litres.

*For cloudy water or after heavy bather loads, shock treat using **Aqua Boost**.*

Do not add chlorine or bromine to pool water

Make sure you have a FREE professional water analysis of your pool or spa water at your local Clark Rubber store every 4 weeks. Ask for your FREE water sample bottle.
